EDUCATION

Prairie View A&M University

MSc Computer Science

Aug. 2026 – Present

Prairie View, TX

University of Ghana

BSc Computer Science

Aug. 2020 – Aug. 2024

Accra, Ghana

EXPERIENCE

Safelynk

Fullstack Software Engineer

Sep. 2025 – Present

Accra, Ghana

- Built a multi-vendor e-commerce platform using Next.js, Flutter, and Node.js/MongoDB, shipping storefronts, vendor dashboards, and an admin console.
- Built an AI business assistant with Retrieval-Augmented Generation with LLM tool calling for context-aware, natural-language queries over vendor store data
- Built a multi-tenant subdomain system on Cloudflare Pages and Next.js middleware that provisions each vendor a branded store URL from a single deployment.
- Integrated a payment system with per-vendor subaccounts and automatic revenue splitting, eliminating manual settlements with automated payouts.

Urban Blu Technology Limited

Fullstack Software Engineer

Sep. 2024 – Aug. 2025

Accra, Ghana

- Built Next.js player/admin portals and an Android POS app, replacing paper ticketing for 200+ retail agents.
- Engineered an ML-based transaction risk-scoring pipeline using behavioral and transactional features to detect anomalous staking and withdrawal activity in real time.
- Unified NexGo, Sunmi, and iPos printer SDKs via Kotlin method channels and runtime detection, collapsing builds into a single APK.
- Added GPS telemetry on all POS devices for real-time monitoring from the admin dashboard.

Mova

Software Engineer

May 2024 – Sep. 2024

Accra, Ghana

- Built Customer and Driver apps in SwiftUI using WebSockets for real-time dispatch and status updates, improving responsiveness.
- Built turn-by-turn navigation and live route syncing between user and driver apps using Google Maps SDK, providing accurate ETAs and responsive rerouting.

ViuHealth Inc

Software Engineering Consultant

Dec. 2022 – Apr. 2024

New York, USA

- Built a cross-platform autoimmune care app and nurse dashboard, improving care coordination for 3,000+ users.
- Migrated the SwiftUI app to Flutter to accelerate releases, reducing time-to-market by 40%.
- Designed a semantic patient-provider matching pipeline using clinical embeddings and cosine similarity to rank specialists against patient symptom profiles.
- Added unit tests and CI/CD with Fastlane with GitHub Actions, cutting deployment time by 65% and enabling zero-downtime releases.

SKILLS

Developer Tools: Git, AWS, Cloudflare, Claude Code, GitHub Actions, VS Code, Docker, Agile/Scrum, Postman

Frameworks: SpringBoot, iOS, React, Next.js, Node.js, Tailwind CSS, Flutter, React Native

Programming: Python, JavaScript, TypeScript, Java, Swift, SQL, Dart, Data Structures & Algorithms, Unit Testing (XCTest, Vitest)
